

NYU Chemistry

## Core Dissertation Committee Member Selection Form

All Ph.D candidates must have a fourth person core dissertation committee by the beginning of their second year. The committee includes your research advisor and at least two other tenure/tenure track faculty members. The fourth member may be an outside expert (for details see graduate guidelines). If the proposed reader does not meet the criteria for membership in the graduate school faculty you will also need to fill out an outside reader form ([https://gsas.nyu.edu/content/dam/nyu-as/gsas/documents/policies-and-procedures-and-forms/writeable\\_outside\\_dissertation\\_reader.pdf](https://gsas.nyu.edu/content/dam/nyu-as/gsas/documents/policies-and-procedures-and-forms/writeable_outside_dissertation_reader.pdf)) and submit the appropriate supplemental documentation.

This form must include the names **and signatures** of your advisor and the members of your committee. Please return the completed form to the graduate office by the third Friday in September.
