

The Novartis Lecture in the Chemical Sciences

New York University Department of Chemistry

Friday, March 29, 2019

Jurow Lecture Hall in the NYU Silver Center

31 Washington Place, room 101

- 1:00** Registration and Coffee/Refreshments
- 1:20** **Opening Remarks: Dirk Trauner, New York University**
- 1:30** **Howard Hang, Rockefeller University**
Richard E. Salomon Family Associate Professor
Chemical Dissection and Translational of the Microbiota
- 2:15** **Christian Hackenberger, FMP Berlin & Humboldt University**
Leibniz-Humboldt Professor of Chemical Biology
The Power of Chemoselectivity: Protein-Conjugates for Extra- and Intracellular Targeting
- 3:00** Coffee Break
- 3:15** **Introduction: Tania Lupoli, New York University**
- 3:20** **Andy Patterson, Novartis Institutes for Biomedical Research**
Senior Investigator, Global Discovery Chemistry
Identification of Two Novel Chemical Series for the Irreversible Inhibition of Myeloperoxidase (MPO)
- 4:05** **Tom Muir, Princeton University**
Van Zandt Williams, Jr. Class of '65 Professor of Chemistry
Painting Chromatin with Synthetic Protein Chemistry
- 4:50** **Closing Remarks: Dirk Trauner, New York University**
- 5:00** Reception
