

INVITATION

"Derrida's *Archive Fever* Reconsidered:" A roundtable

Nicola BEHRMANN, Christian DELAGE, Michael LEVINE

Hosted by Cristina VATULESCU

Both in its argumentative content and stuttering discursive movement, Derrida's *Archive Fever* challenges us to think the following in new ways: the archive as condition of history, the analytic notion of a compulsion to repeat, the intergenerational transmission of traumatic experience, the concept of an unconscious archive, the status of psychoanalysis as a "Jewish science," the relationship of psychoanalysis to the future.
