Date: Tue, 01 Mar 2011 14:34:09 -0500
To: Undergraduate Economic Students <econ-undergrad@lists.nyu.edu>

Princeton Finance Society presents...
The 1st Princeton High Frequency and Quantitative Trading Conference

Date: Friday, March 25, 2011

Location: Peyton 145, Princeton University

The Princeton High Frequency and Quantitative Trading Conference seeks to bring together a unique cross-section of the leading experts from academia, industry, and government in a low-key intellectual environment to catalyze discussions and strengthen ties among these three communities. We will cover subjects ranging from algorithmic trading and liquidity to market impact and the flash crash.

Keynote Speakers include:

Robert A Imgren, Co-founder Quantitative Brokers
Matt Cushman, MD, Knight Trading Group
Andrei Kirilenko, Chief Economist, CFTC
Matthew Rothman, MD, Barclays Capital
Michael Sotiropoulos, MD, Bank of America Merrill Lynch
Haim Bodek, CEO, Trading Machines LLC
Matt Andresen, Co-CEO, Headlands Technologies LLC

Visit our website and register at: <http://orfe.princeton.edu/QuantTrading/>
(Space is limited!! First come, first serve!)

Venue: The conference will be held at Princeton University in Princeton, NJ. The university is home to a number of outstanding institutions at the forefront of research in modern finance, including the **Bendheim Center for Finance**, the **Department of Economics**, the **Computer Science Department**, the **Department of Electrical Engineering**, the **Department of Operations Research and Financial Engineering**, and the **Woodrow Wilson School of Public and International Affairs**.

Participants: We will bring together preeminent experts to discuss the latest advances in high frequency and quantitative trading. The conference also provides industry and government participants an opportunity to interact with 80 to 100 exceptional undergraduate and graduate students from *Princeton, Columbia, NYU, UPenn, Yale*, and other leading universities in the Northeast, many of whom are considering careers in Wall Street and Washington.

Objective: Unfortunately, academia, government, and industry operate within separate silos with industry and government often unable to keep up with each other's developments or the remarkable advances in academia. This conference seeks to break down these barriers and spur future collaboration and research between these three communities.

Career Opportunities: Career Panel by leading industry industry recruiters (GETCO, Citadel, WWFIRS, LLC). Come learn more about the industry and network with students and recruiters!
